

LÖDIGE INDUSTRIES

Lödige Industries offers material handling solutions for various industries and specializes in goods lifts, complex material handling systems and after sales service.

Being world market leader for cargo handling terminals, the Lödige Group employs around 800 people worldwide.

We are offering a position in

Project Engineering

for the Project Management of our Elevator Solutions category

Your tasks would be

- **Organizing, planning and coordinating projects**, starting from tender preparation over to the commissioning and handover of the project to the customer
- Internal coordination of the technical departments
- **Technical representation** of the projects at engineering offices, government agencies, contractors and the customer
- Claim Management
- Project Controlling

Your Profile

Required

- Completed studies in the field of **Electrical or Mechanical Engineering**
- Strong Organization Skills and Assertiveness
- Project Management and Team Management Skills
- Excellent **English** language skills and **MS Office** knowledge
- Availability for occasional trips to our national and international construction sites

Preferable

- **Experience** in Project Management, preferably for lift equipment
- Knowledge of commercial project tasks
- German language skills

We are offering a very **interesting and versatile** place of work in a dynamic, internationally operating medium-sized company in **Warburg, Germany**.

You will get assistance in finding accommodation and settling down in Germany. The company offers a **free German course** for our international colleagues.
