

PhD Scholarship

Supercomputing, Big Data & Machine Learning applications in Finance

A four year scholarship is available to undertake a PhD at the Athens University and Business in the field of “Supercomputing, Big Data & Machine Learning applications in Finance”. Study will be under the supervision of Professor Spyros Skouras (www.spyrosskouras.com). The thesis is intended to span cutting edge theory and practice and this will be facilitated by the participation of an industrial partner.

The scholarship is for four years and the stipend is 10,000 Euros per year. No tuition fees apply.

Candidates should have a record of academic excellence and should be able to demonstrate the desire and ability to learn quickly across a range of subjects. The scholarship is open to candidates with an excellent first degree in any quantitative field. For the avoidance of doubt, no prior knowledge in finance is required and candidates close to completion of their first degree are welcome to apply.

For more information, send a full CV to skouras@aueb.gr as soon as possible and by **30th June 2023** at the very latest. The scholarship will be awarded on an urgent basis.
