

Business Analysis Intern

Fintech start-up Parity Platform is launching a new app for owners of electric vehicles and looking for ambitious colleagues to shape the future of **EV charging** with us.

This is an opportunity to join **our business analyst team** and contribute to the development of LOADER , a blockchain based EV charging web and mobile app, that was selected [among the top 10 innovative projects in 2020 by the European Commission](#).

If you have keen interest in sustainability, clean energy and love optimizing processes we like to meet you.

Responsibilities

- Conduct research on Electric Vehicles and Clean Energy topics.
- Write market reports on the development of e-mobility in Greece and SE Europe.
- Work with the product manager and developers to ideate features for the app based on your research

Requirements

- Excellent writing skills in English
- Analytical skills and familiarity with business process mapping
