

Job Title: Technical Operations Engineer Trainee
Location: Athens, Attica
Reporting to: Chief Operations Officer
Working hours: 40 hours

Job Description:

Talos mobility is seeking a trainee engineer to join its growing operations team in Athens. The trainee will be involved in a number of different operations activities that will provide a unique opportunity to the individual to acquire a wider view of the business. Attitude is key and a can do approach is what we are looking for in our candidates.

Duties and responsibilities:

- Support the electric fleet expansion by supporting both company and customer needs
- Responsible for incident report generation and management
- Manage suppliers to increase fleet availability and improve incident response times
- Support operations requirements capturing and help shape business processes
- Responsible to manage first level of technical issues resolution and necessary escalations
- Support design reviews and technical requirements analysis of Talos Magic Box
- Support the integration of Talos systems into a final product

Skills and Qualifications:

- BSc student during his last year of studies in electronics, software or mechanical engineering.
- Understanding of basic software and electronic principles
- Excellent use of MS suite (VB scripting skills highly appreciated)
- Structured and methodical way of thinking
- Can do attitude and willingness to get exposed in new challenges
- Understanding of electric vehicles, their capabilities and limitations will be highly appreciated
- Holding driving license for both motorbike and car are essential
