Check out this amazing internship opportunity to kick-start your career!

The Role

The Supply Chain Intern is responsible for assisting with business goals to strategically source goods and services, minimize inventory, streamline order fulfillment, and reduce costs as we deliver products that meet our customers' price. In addition, the intern is given the opportunity to apply skills and gain an understanding of the organization through various intern events.

You will

- Build the Supply plan of the entity based on the validated sales forecasts, the co-packing plan and the stocks
- Weekly liaison with our factories for order management & shipment
- Maintain the stock availability within set targets
- Lead the daily order portfolio process with Customer Care, Credit and Warehouse teams
- Manage the division's subcontracting process
- Monthly reporting for our internal and European Management Committee
- Manage the sales forecasts quality
- Manage the monthly sales forecast process
- Build the baseline forecast
- Challenge and consolidate the promotions and launches sales forecasts projected by the Sales and Marketing teams

You are

- An Engineer, eligible for internship
- A team player with great communication skills (both in Greek & English)
- Skilled with MS Excel, experience in SAP is a plus but not mandatory
- Analytical and have a proactive approach
- Open-minded, and motivated to learn
- Able to organize and prioritize, while working under tight deadlines
