

# SUMMER SCHOOL ON GREEN FUELS

August 27th- 29th, 2025

Hersonissos, Crete - Greece

[“Royal & Imperial Belvedere Resort”](#)

The course is focused on the emerging field of green fuels and renewable energy technologies.

Organized by [the CarbonNeutralLNG project](#), this summer school offers in-depth knowledge of green fuels, including the synthesis of methane from green H<sub>2</sub> and biogenic CO, and the innovative processes used to convert biomass residues into bioLNG.

The program will focus not only on process development but also on the application of LCA and LCC to assess the sustainability of green fuels and energy solutions.

This [summer school](#) is ideal for students and researchers eager to gain practical experience in cutting-edge renewable energy technologies.

Registration [here](#)
