

Workshop on "Sustainability Assessment in Manufacturing Processes"

Online Workshop

December 17th, 2025

11:00 - 13:00 EET (Greek time) | (10:00 - 12:00 CET)

Operational Research & Logistics Laboratory (ORLOG) - NTUA is organizing a free online workshop on sustainability assessment in manufacturing processes, as a conclusion to the CISAMS Project. We are delighted to invite you to this event, where we will present our integrated framework for assessing circularity, environmental sustainability, and social sustainability in manufacturing systems.

The session will feature:

- ◆ Keynote Talk: "Sustainability and circularity in the metals industry: Key challenges and trends" by George Mavraganis, Strategic Planning and Sustainability Director, Copper Segment, ELVAL HALKOR S.A.
- ◆ A walkthrough of the CISAMS methodology and its practical application on a real-life manufacturing case study
- ◆ Case study insights you can directly transfer to your own work
- ◆ Live polls and discussion to capture expert perspectives

The workshop is open to industry professionals, researchers, academics, students and anyone interested in circular manufacturing and sustainability assessment.

Join us to learn more about the outcomes of the project! Your participation and feedback will be highly valuable for the continued development of the CISAMS framework.
