Software Development Intern

Job brief

We are deploying electric vehicle charging transaction software and looking for ambitious collegues to shape the future of **EV charging** with us.

This is an opportunity to join our tech team and contribute to the full development life cycle of LOADER , a blockchain based EV charging web and mobile app, that was selected among the top 10 innovative projects in 2020 by the European Commision.

If you have keen interest on fintech, blockchain and EVs we would like to meet you.

Responsibilities

- Work with the development team and product manager to ideate features for the app
- Build the front-end of applications through appealing visual design
- Develop and manage well-functioning databases and applications
- Test software to ensure responsiveness and efficiency
- Build features and applications with a mobile responsive design

Requirements

- Github portfolio or similar sample of previous development projects
- Knowledge of front-end languages and libraries (e.g. HTML/ CSS, JavaScript, jQuery, Bootstrap).
- Knowledge of Python
- Familiarity with databases (e.g. PostgreSQL, MySQL, MongoDB),
- Available to start July 2020
